Career Objective

AI-focused Computer Science student passionate about building practical AI products that solve real-world problems. Experienced in Python, FastAPI, machine learning, APIs, automation, and end-to-end product development. Enjoy taking ownership, learning quickly, and turning ideas into working solutions. Looking to contribute in a fast-paced startup environment where I can build, experiment, and create meaningful impact.

Technical Skills

- **Programming:** Python, SQL
- **AI & Machine Learning:** Supervised & Unsupervised Learning, Classification, Clustering (K-Means), Feature Engineering, Model Evaluation
- **Generative AI:** Prompt Engineering, LLM Applications, OpenAI API, AI Workflow Automation
- **Backend Development:** FastAPI, Flask, REST APIs
- **Data Science:** Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), ETL Pipelines
- **Libraries:** Pandas, NumPy, Scikit-learn, Matplotlib, BeautifulSoup
- **Databases:** MySQL, SQLite
- **Developer Tools:** Git, GitHub, Postman, Jupyter Notebook, VS Code

Projects

Headphone Analytics Dashboard *FastAPI, SQLite, Python, BeautifulSoup*

- Built an end-to-end data pipeline to collect and process 1000+ product records for analytical insights.
- Performed data cleaning, transformation, and feature extraction for structured analysis.
- Designed REST APIs using FastAPI for data access and integration with downstream applications.
- Implemented automated workflows with logging, error handling, and scheduling for scalable data processing.
- Enabled data-driven insights for pricing trends and product comparisons.

Customer Segmentation & Retention System *Flask, MySQL, Python, Scikit-learn*

- Built an end-to-end ML pipeline for customer segmentation and retention prediction.
- Applied K-Means clustering and classification models on processed datasets.
- Engineered features and optimized models using performance evaluation metrics.
- Deployed ML models using Flask APIs for real-time inference.

Internship Experience

QSpiders, Ahmedabad *Jan 2026 - Apr 2026*
Data Science Intern

- Performed data preprocessing, EDA, and analysis on real-world datasets.
- Built machine learning models for prediction and classification.
- Optimized data processing workflows using Python and SQL.

Education

Government Engineering College, Patan Aug 2022 – Apr 2026
B.E. in Computer Science & Engineering CGPA: 7.59

Certifications & Activities

- **FinTech Program** — BSE Institute (2024)
- NSS Volunteer — Community Service (2023–2025)
